1. By means of this Form, which replaces any previously issued notification concerning submission or transmittal of priority documents, the applicant is hereby notified of the date of receipt by the International Bureau of the priority document(s) relating to all earlier application(s) whose priority is claimed. Unless otherwise indicated by the letters "NR", in the right-hand column or by an asterisk appearing next to a date of receipt, the priority document concerned was submitted or transmitted to the International Bureau in compliance with Rule 17.1(a) or (b).
2. (If applicable) The letters "NR" appearing in the right-hand column denote a priority document which, on the date of mailing of this Form, had not yet been received by the International Bureau under Rule 17.1(a) or (b). Where, under Rule 17.1(a), the priority document must be submitted by the applicant to the receiving Office or the International Bureau, but the applicant fails to submit the priority document within the applicable time limit under that Rule, the attention of the applicant is directed to Rule 17.1(c) which provides that no designated Office may disregard the priority claim concerned before giving the applicant an opportunity, upon entry into the national phase, to furnish the priority document within a time limit which is reasonable under the circumstances.
3. (If applicable) An asterisk(\*) appearing next to a date of receipt, in the right-hand column, denotes a priority document submitted or transmitted to the International Bureau but not in compliance with Rule 17.1(a) or (b) (the priority document was received after the time limit prescribed in Rule 17.1(a) or the request to prepare and transmit the priority document was submitted to the receiving Office after the applicable time limit under Rule 17.1(b)). Even though the priority document was not furnished in compliance with Rule 17.1(a) or (b), the International Bureau will nevertheless transmit a copy of the document to the designated Offices, for their consideration. In case such a copy is not accepted by the designated Office as priority document, Rule 17.1(c) provides that no designated Office may disregard the priority claim concerned before giving the applicant an opportunity, upon entry into the national phase, to furnish the priority document within a time limit which is reasonable under the circumstances.

We refer to the First Written Opinion of the International Preliminary Examining Authority mailed on 17 March, 2005 in respect of the above application.

Pursuant to Article 34, the Applicant requests the International Preliminary Examining Authority take into account the following comments when conducting the International Preliminary Examination.

## COMMENTS

We note that in the First Written Opinion, the Examining Authority asserts that US 3465765 "explicitly discloses all the features of claims 1-6" of the present application. We respectfully submit that this assertion is incorrect.

US 3465765 discloses a shelter for a vehicle including a horizontal plate 11 and a frame for supporting a sheet material connected to the plate. Figures 1 to 4 show that the frame comprises a plurality of arcuate supports 17 extending both laterally and longitudinally across the plate 16. It is noted that at several locations on the frame one support cross over another to define join locations.

However, we note that US 3465765 does not disclose at least two of the supports (hoop members) extending diagonally across the plate 11 in a cruciform orientation as is stipulated by claim 1 of the present application. The diagonal extension of the hoop members 22 is clearly depicted on Figure 3 of the present application. Further, it appears that none of the cited documents D1 –D6 disclose this feature.

The applicant has found that this diagonal support member configuration advantageously provides a stronger structure for resisting wind loads, whilst minimising the number of support (hoop) members required. In addition, resilient members can be used, which are lighter and easier to store in kit form. It is uncertain if the arcuate supports of US 3465765 are resilient as it is stated that they "may be flat bands of material such as plastic, or aluminium" (column 2, lines 26-27), which of course may be rigid or resilient.

It is submitted that the diagonally extending hoop member feature stipulated by claim 1 of the present application does not constitute a mere workshop improvement but rather provides a significant inventive step and confers novelty over the prior art.

In light of the above, we would be grateful if the IPEA would establish a clear report.

Yours respectfully  
Shelston IP
